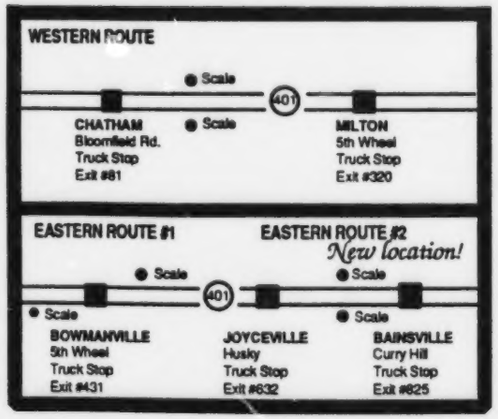
VEHICLE AND PERFORMANCE DATA

RESULTS

1988 Economy Challenge

Route		Code	Distance
Milton	Chatham	M — C	240.7 km (149.6 miles)
Chatham	Milton	C — M	239.3 km (148.7 miles)
Bowmanville	Joyceville	B — J	202.0 km (125.5 miles)
Joyceville	Bowmanville	J — B	202.9 km (126.1 miles)
Joyceville	Bainsville	J — Q	194.3 km (120.7 miles)
Bainsville	Joyceville	Q — J	193.3 km (120.1 miles)



START TIMES

Truck Stop	12 noon on the first day continuously until 12 midnight on the last day
Joyceville-Bainsville	Sept. 12, 13, 14, 15
Bowmanville – Joyceville	Sept. 19, 20, 21, 22
Chatham-Milton	Sept. 26, 27, 28, 29

Notes

Driver Coding — Column 1 Type

- C = Company
- O = Owner/Operator
- S = Supervisor/Test Driver
- M = Ministry of Transportation Driver
- * = Time Penalty

Each category must contain at least three entries to be eligible for awards. When there were insufficient entries in a stock class category, the company drivers and owner/operators were combined.

Ranking

The ranking of each weight category includes two possible groups C (company) or O (owner/operator), unless combined.

Number of Entries

Drivers in the Stock Class are permitted to enter a maximum of 4 times in total.

Only the driver's one best placement appears in this publication.

The Supervisor Class allows for an unlimited number of entries. Total entries for 1988 were 505.

Time Limits and Penalties

A time limit was enforced to prevent drivers from travelling dangerously slow during the Challenge. Anyone not maintaining at least an average speed of 80 km/h (50 mph) was penalized. The penalty was calculated by increasing the competitors' fuel (L/t•100 km) rating 2% for every km/h under 80 km/h. (Note: 5 minutes was allotted for weighing at the designated scales.)

Calculation of Results

The results of the Fuel Economy Challenge are based on *litres per metric tonne per 100 kilometres* also expressed as L/t•100 km. This figure is based on the number of litres of fuel used to move a gross vehicle weight (GVW) of one metric tonne over a distance of 100 kilometres. The formula used to calculate this measure of performance is:

$$\frac{\text{Fuel Used (Litres)} \times 100}{\text{GVW (tonnes)} \times \text{Distance of Run (km)}}$$

On each day of the competition, a control vehicle drove over the route in each direction, and its performance for each route was calculated in L/t•100 km. The performance of each contestant was later adjusted by a factor derived from the daily performance of the control vehicle on each route, compared to the average L/t•100 km performance over all routes. For example, the adjustment factor for all contestants on route/day "A" would be derived from the daily and the average performance of the control vehicle, as follows:

$$\frac{\text{Average L/t•100 km} - \text{L/t•100 km on day/route A}}{\text{L/t•100 km on day/route A}} + 1$$

The adjusted results of the contestant on route/day "A" would then be calculated by multiplying his/her unadjusted result by that adjustment factor.

Each contestant's unadjusted result in miles per gallon (mpg) was similarly adjusted by a factor that was derived from the performance of the control truck on that particular route/day compared with the average performance (mpg) over the 3 routes. For example, the mpg adjustment factor for route/day "A" would be calculated as follows:

$$\frac{\text{Average mpg} - \text{mpg for day/run A}}{\text{mpg for day/run "A"}} + 1$$

As before, the adjusted mpg performance of the contestant on day/route "A" would then be calculated by multiplying his/her unadjusted mpg performance by that mpg adjustment factor.

It is hoped that the following data can be useful to the equipment manufacturers and the trucking industry who have helped sponsor the 1988 Economy Challenge, and to whom we are extremely grateful.

Abbreviations used in the tables:

C	Company Driver	DD	Direct Drive
O	Owner/Operator	OD	Overdrive
S	Supervisor	Mich	Michelin
GVW	Gross Vehicle Weight	G/year	Goodyear
Intern	Navistar International	B/stone	Bridgestone
W.Star	Western Star	Y/hama	Yokohama
F/liner	Freightliner	F/stone	Firestone
Knwth	Kenworth	R	Radial
Petebt	Peterbuilt	LS	Large Single
GM/W	GM White	LP	Low Profile
Conv	Conventional	B	Bias Ply
COE	Cab Over Engine	Defl	Air Deflector

Acknowledgements

Trucksave would like to thank the following individuals and companies for their support in making this Challenge possible.

Economy Challenge Committee

S. Bigus	- Labatt's
C. Brown	- Eastern Rentals
B. Capes	- Sprint
D. Doran	- Esso
R. Dunbrooke	- Carling O'Keefe
R. Haystead	- Kingsway
C. Hoonaard	- GTL
T. Short	- MTO Challenge Co-ordinator
T. Speed	- T.C.C. Bottling Ltd. (Coca-Cola)
H. Weisher	- Molson's

- Volvo GM Canada, for the loan of a tractor for use as the control vehicle
- Glengarry Transport Ltd., for the loan of a trailer for the control vehicle
- Participating truck stop managers and their staff
  - Fifth Wheel Truck Stops, Milton/Bowmanville
  - Ten Wheels Truck Plaza, Joyceville
  - Bloomfield Truck Stop, Chatham
  - Curry Hill Truck Stop, Bainsville
- The MTO personnel working in the weigh stations and truck stops
- The fleet managers and dispatchers who arranged for their drivers to enter the Challenge.
